

## **Gemmojis™**

**Along with continued support and input from my loyal students of Gemmotherapy I've discovered a method of stabilizing emotional health with specific extracts.**

Your browser does not support iframes.

A microdose (1-2 drops) directly on the tongue, of one of these particular extracts, offers the support to process and resolve an acute emotional state and over time address emotional states that have become chronic.

The achieved results are only possible with a microdose, otherwise, the extract will activate actions on other organs or organ systems.

Up to 3 extracts can be combined at one time to support complex emotional states.

**Extracts most suitable for Morning and**

**Midday:**

Silver Birch Seed

Silver Lime

Sea Buckthorn

Almond

Common Fig

Giant Redwood

Dog Rose

Oak

**Extracts most suitable for Evening:**  
**(minimum of 2 hours prior to bedtime)**

Hazel

Field Maple

Hawthorn

White Willow

Black Honeysuckle

Lithy
