Why Gemmotherapy?

I was first drawn to Gemmotherapy for use as organ support. I discovered it can do so much more. The extracts gently improve emotional wellness, open elimination pathways, improve sleep and restore balance to the central and autonomic nervous system.

This is how I believe we heal:

Through the study of gemmotherapy I believe we heal by first harmonizing the central and autonomic nervous systems.

Secondly, supporting the elimination pathways so the body can clean itself more efficiently. Thirdly we can use targeted extracts to support organ/s or body system/s. The gemmotherapy extracts nourish the tissues, restore balance, enhance immunity, and eliminate bothersome symptoms.
